| Pruning Info: | | | | | | |
| Pruning Group A: These varieties flower on growth produced the previous year. Lightly prune out weak or dead stems, right after blooming is finished (May or | | | | | | |
| Pruning Group B1: These varieties flower on wood that was hardened off from previous year's growth. | | | | | | |
| This group usually consists of a heavy flush of flowers in May - June on the previous season's growth, followed by a second smaller flush of blooms in September | | | | | | |
| Note: If rejuvenation is needed, a severe pruning can be carried out. It will reduce the number of flowers, but will not hurt the plant. Follow instructions as in Group C. | | | | | | |
| Pruning Group B2: These varieties bloom simultaneously on last year's growth and the current season's growth. | | | | | | |
| This group usually blooms from June to September continuously. Pruning can be done as in Group B1, or Group C every 2nd year. | | | | | | |
| Pruning Group C: These varieties bloom on the current season's growth only. | | | | | | |
| Blooms commence in summer and continue through fall. Prune back in late Feb or March to two strong sets of buds on each stem close to ground level. | | | | | | |
| | | | | | | |
