<b>Boysenberry</b>					
<b>Boysenberry</b> ( <i>Rubus ursinus</i> x <i>idaeus</i> )	Cross between blackberry and loganberry or red raspberry. Dark reddish black fruit has a sweet and tangy flavor and is especially valued for canning and preserving and for use in pies and cobblers				11.95 (22) 17.95 (6)
<b>Cranberry</b>					
<b>Cranberry</b>	<b>Native. Attracts pollinators, wildlife</b>				
Cranberry ( <i>Vaccinium macrocarpon</i> )	Low growing, prostrate form, small, delicate, evergreen leaves, slender stems up to 1m long. Ht 15-20cm (6-8"). Pink bell-shaped flowers in spring produce large red cranberry fruit in fall. High in vitamin C and iron, used to make juice, jams, jellies, cranberry sauce. Full sun, moist to wet, acidic soil.	4		Self	<b>Quart pot: 1 -24 \$4.95 each 25 &amp; over \$4.00 No discount on net price</b>
<b>Currants</b>					
	<b>Attracts pollinators, birds. Good air circulation. Full sun to partial shade, rich, moist, well-drained soil.</b>				
Consort Currant	Extremely productive, produces clusters of medium sized black berries with Blackberry flavor. Very hardy and disease resistant. Reliable and easy to maintain. Birds rarely bother this variety. Great for jelly, jams and sauces 1 -2m high	4	July	Self-fruitful	18.95 (5)
Ben Nevis Currant	White flowers followed by tart edible black berries, good for jams and jellies. Green leaves turn yellow in the fall. 2m x 1m	3	July	Self-fruitful	18.95 (17)

Name	Description	Zone	Harvest	Pollination	Price/(Stock)
Red Lake Currant	Large bright red berries. Fruit is good for jam, jelly, and wine	3	Late July	Self-fruitful	26.95 (10)
Titania Black Currant ( <i>Ribes nigrum</i> 'Titania')	Midseason variety. Large hanging clusters of lovely black fruit. Upright, vigorous bushes. Ht 1 - 1.5m. Prune in late winter, early spring. Best fruit production on one-year old wood. Remove all wood older than 3 years, annually, to the ground. Mature healthy bush should have 10-12 canes, half being one-year old wood. Spacing 1 - 1.5m apart. Very high in vitamin C, antioxidant, good for baking, juice. Full sun to partial shade, rich, well-drained soil. Disease resistant.	3	July	Self-fruitful	24.95 (2)
White Pearl Currant ( <i>Ribes rubrum</i> 'White Pearl')	Greenish-yellow flowers in spring produce long, pendant clusters of translucent fruit with a pinkish/yellow blush. Fruit can be eaten fresh or used for jelly, jams or pies. Ht 1 - 1.5m. Space 1m apart, full sun to partial shade, rich, well-drained soil.	3	July	Self-fruitful	24.95 (5)
Pink Champagne Currant ( <i>Ribes rubrum</i> 'Pink Champagne')	Greenish-yellow flowers in spring produce long, pendant clusters of fruit the colour of champagne blushed with pink. Less tart than the red currants, can be eaten fresh but more likely used for jams, jellies and pies. Ht 1 - 1.5m.	3	Late July	Self-fruitful	16.95 (15)
<b>Elderberries</b>	<b>Attracts pollinators, birds. Native.</b> Huge flat umbels of creamy-white flowers (May-June) are edible, can be deep fried in batter, used in baking, or added to fruit salads. Harvest large, shiny dark purple clusters of berries in Aug/Sept. Berries are tasty for jams, pie and wine. Fruit is also used in food colouring and in nutraceutical industry for it's high anti-oxident properties and vitamin content. Vigorous upright, arching shape, attractive green compound foliage. Prune to shape in early spring, or can rejuvenate older shrubs by removing 1/3 of oldest branches to ground level. This is a hardy Canadian variety, good producer. Early to ripen with medium-sized fruit and very good flavour. Partially self-fruitful, two or more varieties are recommended for better fruit production. Plant at least 2m apart, 4-5m between hedgerows. Full sun to partial shade, rich, moist, well-drained soil. Ht 3-4m, spread 2.75m.				
American Elderberry ( <i>Sambucus nigra</i> ssp. <i>canadensis</i> )	Small white, fragrant blooms in spring produce clusters of blue-black berries in late summer to fall.	3	Aug/Sept	Partially self-fruitful	31.95 ( 8)
Kent Elderberry ( <i>Sambucus canadensis</i> 'Kent')	Medium-sized , black fruit with very good flavor. Used for cooking or dehydrating	3	August	Partially self-fruitful	25.95 (10)

Name	Description	Zone	Harvest	Pollination	Price/(Stock)
Victoria Elderberry ( <i>Sambucus canadensis</i> 'Victoria')	Medium-sized purple-black fruit. Excellent flavor and moderately vigorous. Used for jams, jellies and pies.	3	September	Partially self-fruitful	25.95 (10)
<b>Goji Berry</b>	<b>Deer resistant, Attracts pollinators, birds.</b>				
Goji Berry ( <i>Lycium barbarum</i> )	Sprawling shrub with long, flexible canes, small, grey-green leaves. Brilliant royal-purple flowers (continuously all summer) produce bright-red, oval-shaped fruit which grow sweeter as they mature on the plant. Grow in full sun to partial shade, moist, well-drained soil. Staking may be necessary. Blooms on new wood. Ht 1.5 - 2.1m. Mulch to protect root zone, feed in early spring (ie. rose fertilizer). Rich in vitamins, antioxidant, eat fresh, frozen or dried.	5	Summer to frost	Self-fruitful	14.95 (18)
Big Lifeberry® Goji ( <i>Lycium barbarum</i> 'SMNDBL')	Extra-large, red fruit.	5	Summer to frost	Self-fruitful	31.95 (3)
Dynamite Goji ( <i>Lycium barbarum</i> 'Dynamite')	Brilliant-red, large berries, thornless.	5	Summer to frost	Self-fruitful	16.95 (12)
Firecracker Goji ( <i>Lycium barbarum</i> 'Firecracker')	Brilliant-red, large berries, thornless.	5	Summer to frost	Self-fruitful	16.95 (12)
Sweet Lifeberry® Goji ( <i>Lycium barbarum</i> 'SMNDSL')	Red fruit.	5	Summer to frost	Self-fruitful	31.95 (7)
<b>Gooseberry (<i>Ribes</i>)</b>	<b>Attracts pollinators, birds. Good air circulation. Full sun to partial shade, in soil rich, moist, well-drained, pH 6 - 6.5.</b>				
Hinnonmaki Red Gooseberry	Hybrid variety from Finland, heavy bearer. Large beautiful red fruit, superb flavour, sweet flesh, tangy outer skin. Eat fresh, baked pies. Upright growth habit, height 1 - 1.5m. Thorns. Space 1m apart. Mildew resistant variety.	4	July	Self-fruitful	29.95 (15)
Hinnonmaki Yellow Gooseberry	Hybrid variety from Finland. Medium size, pale yellow-green fruit, sweet flesh, tangy outer skin. Eat fresh, baked pies. Upright growth habit, 1.25m in height and spread. Disease resistant.	4	July	Self-fruitful	24.95 (3)
Pixwell Gooseberry	American variety. Pale green fruit become pink when ripe. Few thorns. Produces fruit on old wood. Makes good jelly. Mildew resistant. Midseason.	4	July	Self-fruitful	24.95 (2)
Captivator Gooseberry	American variety is a hybrid American and European cultivars. Large, pink to red, tear-drop shaped fruit, with a sweet mild taste. Nearly thornless and mildew resistance, moderate yields. Late season.	4	July	Self-fruitful	16.95 (12)

Name	Description	Zone	Harvest	Pollination	Price/(Stock)
Poorman Gooseberry	American variety. Medium-sized, green oval-shaped fruit turns pink when ripe, pleasant sweet-tart flavor. Vigorous plants are less thorny than other varieties. Great fresh eating or cooking. Productive, mildew resistant. Early to mid-season.	4	July	Self-fruitful	16.95 (13)
Welcome Gooseberry	American variety. Top yielder, large berries turn from green to pinkish-red when ripe. Sweet-tart flavour. Spreading growth habit, height 60-90cm, spread 1.2 to 1.8m. Mildew resistant. Early to mid-season.	4	July	Self-fruitful	16.95 (3)
<b>Grapes (Vitis)</b>					
<b>Full sun, medium water, good drainage. Pruning required, produces fruit on new wood. Attracts pollinators, birds, wildlife.</b>					
S. V. 23-512 White Wine Grape	White wine grape with elliptical shape that is frost tender.	5	Late	Self-fruitful	16.95 (6)
Canadice Seedless Grape	Medium (15-20cm) clusters of small, seedless red grapes, excellent spicy grape taste, with no tough skins. Great for <b>fresh eating</b> , jelly, juice and wine.	5	Early	Self-fruitful	16.95 (17)
Concord Grape	Large, blue-black berries, in large, loose clusters. Juicy, sweet musky flavour, inside thick, tannin-rich skin, excellent for eating. Resistant to powdery mildew. Used for preserves, juice, wine, <b>fresh-eating</b> (has seeds). American variety, ( <i>Vitis labrusca</i> ), originated in 1849, Concord Massachusetts.	5	Early Oct	Self-fruitful	16.95 (1) (25 Aug)
Flame Grape	Medium-sized clusters of round, red, seedless fruit, firm, crisp texture. Good for <b>fresh eating</b> , dried as raisins.	7	Early	Self-fruitful	16.95 (9)
Fredonia Grape	Changes from pink to deep purple when ripe, very large, Concord-type grape, but ripens earlier than Concord (September), not as flavourful. Used for juice, preserves, wine and <b>fresh eating</b> . American hybrid variety.	5	Late September	Self-fruitful	29.95 (5)
Frontenac Gris Wine Grape	Grey-coloured fruit suitable for white wine production. Cold hardiness and disease resistant grape. Very good productivity	4	Early midseason	Self-fruitful	12.95 (8) 16.95 (11)
Himrod Grape	Seedless-yellow gold, medium sized, crispy, sweet fruit. Excellent for home garden. Good for <b>fresh eating</b> .	5	Late Sept	Self-fruitful	16.95 (7) (25 Aug)
Kay Gray Grape	White wine grape, very hardy and productive. Forms small clusters of small fruit, pleasant fruity flavour. Also good for <b>fresh eating</b> .	4	September	Self-fruitful	16.95 (7)
L'Acadie Blanc Wine Grape	White wine grape, citrus & green apple scents. Very hardy, disease resistant.	4	Mid - Late-midseason	Self-fruitful	14.95 (1)
Lucy Kuhlmann Wine Grape	Early ripening, very hardy red wine grape, vigorous, productive, forms tight, medium-sized bunches.	4	Early	Self-fruitful	10.95 (8)
Marquette Wine Grape	Red wine grape, vigorous vine, very cold hardy. Regular pruning and full sun. Disease resistant.	4	Early midseason	Self-fruitful	16.95 (8)

Name	Description	Zone	Harvest	Pollination	Price/(Stock)
Pinot Gris Wine Grape	Darkest-skinned grape used in the production of white-wine. Grapes can vary from grey-blue brownish pink, sometimes on the same bunches. Resulting wine tend to have quite deep golden, even copper-toned				16.95 (1)
Sovereign Coronation Grape	BC introduction, fairly hardy grape, thick skin, blue-purple fruit, seedless, a distinctive musky taste. Good for <b>fresh eating</b> .	5	Midseason	Self-fruitful	16.95 (5)(25 Aug) 18.95 ( 7) 29.95 (3)
Suffolk Red Grape	Red, medium to large clusters of seedless grapes. Mild, spicy-sweet flavor, good for <b>fresh eating</b> .	5	Early to Midseason	Self-fruitful	16.95 (10) 17.95 (25 Aug)
Vanessa Grape	A hardy, seedless red grape with medium sized compact clusters of medium-sized, mild to fruity flavour, good for <b>fresh eating</b> . Ripens before Concord	5	September	Self-fruitful	16.95 (18)
Vidal Wine Grape	Very productive white wine grape. Tends to over crop and crop prematurely. Thinning fruit is recommended. Very thick skin ( Makes a dry white wine)	5	October	Self-fruitful	16.95 (6)
<b>Haskap Berry aka. Honeyberry (<i>Lonicera caerulea/ kantschatica</i>)</b>	<b>Native to Canada, Russia and Japan. Attracts pollinators, birds (use 1/4" - 1/2" netting).</b> High yielding, pest and disease resistant. Flavor is a combination of a blueberry, saskatoon, and raspberry. High in antioxidants, vitamin C. Needs two different varieties for cross pollination (see recommended varieties in descriptions below, ratio 1:5, close proximity). Space shrubs 1.2 to 2m apart, 2.5 to 3m between rows.				
Aurora Haskap	Companion variety for Borealis. Very productive and has large sweet tasting berries that are easy to pick. One Aurora plant can pollinate eight Borealis and vice versa.	3	Late June	Borealis	14.95 ( 16 Aug)
Berry Blue (aka Berry Smart Blue) Haskap Berry	Russian variety. Fastest growing and tallest varieties (ht 1.8 to 2.4m), many flowers. Somewhat smaller and not as sweet of fruit, offers a high yield. Recommended by U of Sask. as a pollinator variety.	3	June	any other variety	14.95 (38)(32 Aug)
Borealis Haskap Berry	Canadian variety. Sweet/tangy, large fruit. Not as firm as Tundra. Compact growth habit, height 1.2m.	3	June	Aurora, Honeybee, Berry Blue	14.95 ( 35) (16 Aug) 15.95 (25) 24.95 ( 5)
Honey Bee Haskap	Canadian variety. Selected to be a pollinator for 'Borealis', 'Tundra' & 'Indigo Series'. Fast growing as well as quick to set fruit. Fruit is held on the bush very firmly. The also stay on the plant longer than most other varieties. Not recommended for mechanical harvesting. 2.1m x 1.5m	3	Late June	Used as a pollinator	14.95 (16 Aug)
Northern Jewel Haskap Berry	Russian variety. Similar fruit to Tundra. Recommended as a pollinator variety.	3	June	any other variety	14.95 (6)
Sinoglaska Haskap Berry	Russian variety. Large, dark blue-black berries, up to 2cm long.	3	June	any other variety	

Name	Description	Zone	Harvest	Pollination	Price/(Stock)
